Выполнение лабораторной работы

### Устанавливаем pass и gopass через команду dnf install от прав sudo (суперпользователя)

```
rapavi/ichenkomrapavi/ichenko:-5 sudo dnf install pass pass-otp-
[sudo] napon, am rapavi/ichenko:
Updating and loading rapostories:
Repositories loaded.
Raker 'pass-iz/-2-10-da-fa-loaden' yes yeramonam.
Raker 'pass-iz/-2-10-da-fa-loaden' yes yeramonam.
Nothing to do.
rapavi/ichenkomrapavi/ichenko:-5 sudo dnf install gopass
Updating and loading rapositories:
Repositories loaded.
Raker 'Egopass-115.15-2-fc41.x86.54" yes yeramonam.
Nothing to do.
rapavi/ichenkomrapavi/ichenko:-5
```

#### Просматриваем списки ключей и генерируем ключ

```
repartichenheigrapavtichenho;-s gng —list-secret-keys gng: cospan waraam / Joan/rapawtichenho/gnnge gng: cospan waraam / Joan/rapawtichenho/gnnge gng: cospan waraam / Joan/rapawtichenho/gnnge rapawtichenhograpavtichenko;-s gng —roll-generate-key gng (Gnufi) 2,455 (Sporjeft (C) 2824 glic Good Genbli This is free software; you are free to change and redistribut with the company of the company of
```

## Создаем новый репозиторий pass

## Инициализируем хранилище через команду pass init и создаем структуру git

```
Beithub com: Rodion-77/pass.git
```

#### Синхронизируем репозиторий командами pass git pull и pass git push

```
rapartichenkograpartichenko: 3 pass git push —set-upstream o rigin master heperuchanne dokentos: 6, roroson. Departiciones dokentos: 6, roroson. Departiciones dokentos: 1000 (073), roroson. Santos dokentos: 1000 (073), roroson. Santos dokentos: 1000 (073), idoari | 531.09 Mig/c, roroso. Santos dokentos: 1000 (073), idoari | 531.09 Mig/c, roroso. ```

### Комитим и выкладываем изменения на git, проверяем статус синхронизации

```
ropax (finencerupar) (foneka: d.d.-/,passord-store/
rapax(themborgapax(thembor-/,passord-store/
rapax(themborgapax(thembor-/,passord-store) git add .
-apax(themborgapax(thembor-/,passord-store) git commit -an
-adt namual)
-adt
```

# Hастраиваем интерфейс браузера командами dnf copr enable maximbaz/browserpass и dnf install browserpass

rapax (Ishander pax (Ishander) // passworf store's sudo dof copressible make has // passworf store's sudo dof copressible make has // passworf store's document of the party copy report in report for the party copy report in report in report in report in the memorite section of the party report in the memorite section of the party report in the memorite section of the party report in the party report repor

#### Устанавливаем плагин для Firefox

# Создаем файл pass.txt и добавляем новый пароль, отображаем пароль командой pass и заменяем пароль

#### Устанавливаем дополнительное программное обеспечение

```
rapart tchembojrapartichemboj-r, pesswerd-store$ sudo dnf -y in stall \( \) dunst \( \) fortimesome-fonts \( \) fortimesome-fonts \( \) fortimesome-fonts \( \) tight \( \) fuzzel \( \) susylock \( \) kitty \( \) susylock \
```

#### Устанавливаем шрифты

```
Package
                  Arch Version
                                        Repos
```

## Устанавливаем бинарный файл

```
rapart(ibenium/rapart)themse://password-stores sh -c "S(mget -go-c chezmo:1.0/get)" info found version 2.00.1 for latest/linux/amd64 info found glibb version 2.40 info installed bin/chezmo: capart(lehendrapart)themse:/password-stores
```

Создаем собственный репозиторий с помощью утилит командой gh repo create dotfiles –template="yamadharma/dotfiles-template" –private и подключаем репозиторий к своей системе

reportionneed provides and content to the provides and content to the content co

Извлекаем последние изменения из репозитория и применяем их командами chezmoi update, hezmoi git pull – -autostash -rebase && chezmoi diff, chezmoi apply.

```
rapactitionselepsel(themsel/passerd-stere) detect update 

repart(themselepsel(themsel-passerd-stere) through update 

repart(themselepsel(themsel-passerd-stere) through update 

repart(themselepsel(themsel-passerd-stere) through upply 

repart(themselepsel(themsel-passerd-stere) through upply 

repart(themselepsel(themsel-passerd-stere) through update 

repart(themselepsel(themsel-passerd-stere) 

repart(themselepsel(themsel-passerd-stere) 

repart(themselepsel(themselepsel(themsel)))
```

мы настроили рабочую среду, разобрались как работает менеджер паролей pass.
